Project Title: Blood Donation

Project Description:

Blood Donation site contains information about the number of blood banks and applicants willing to Donate blood.

It should covers the following modules:

Register, Why to donate blood, who can give blood, Refer a friend, Contact us

Rubrics:

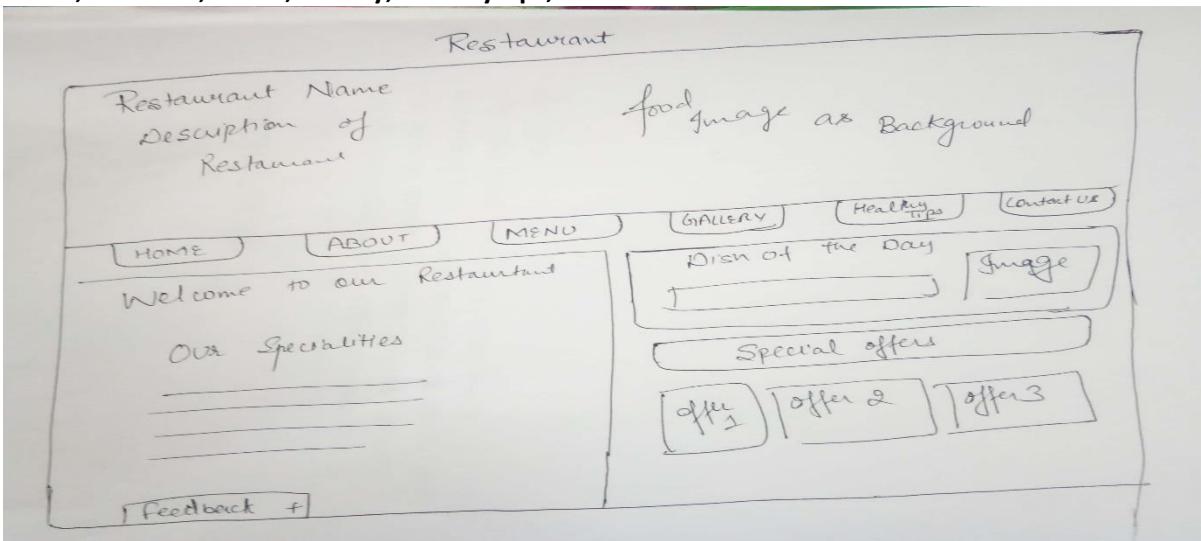

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project No: 2

Project Title: Restaurant

Project Description: It should covers the following modules:

Home, About us, Menu, Gallery, Healthy tips, Contact us

Rubrics:

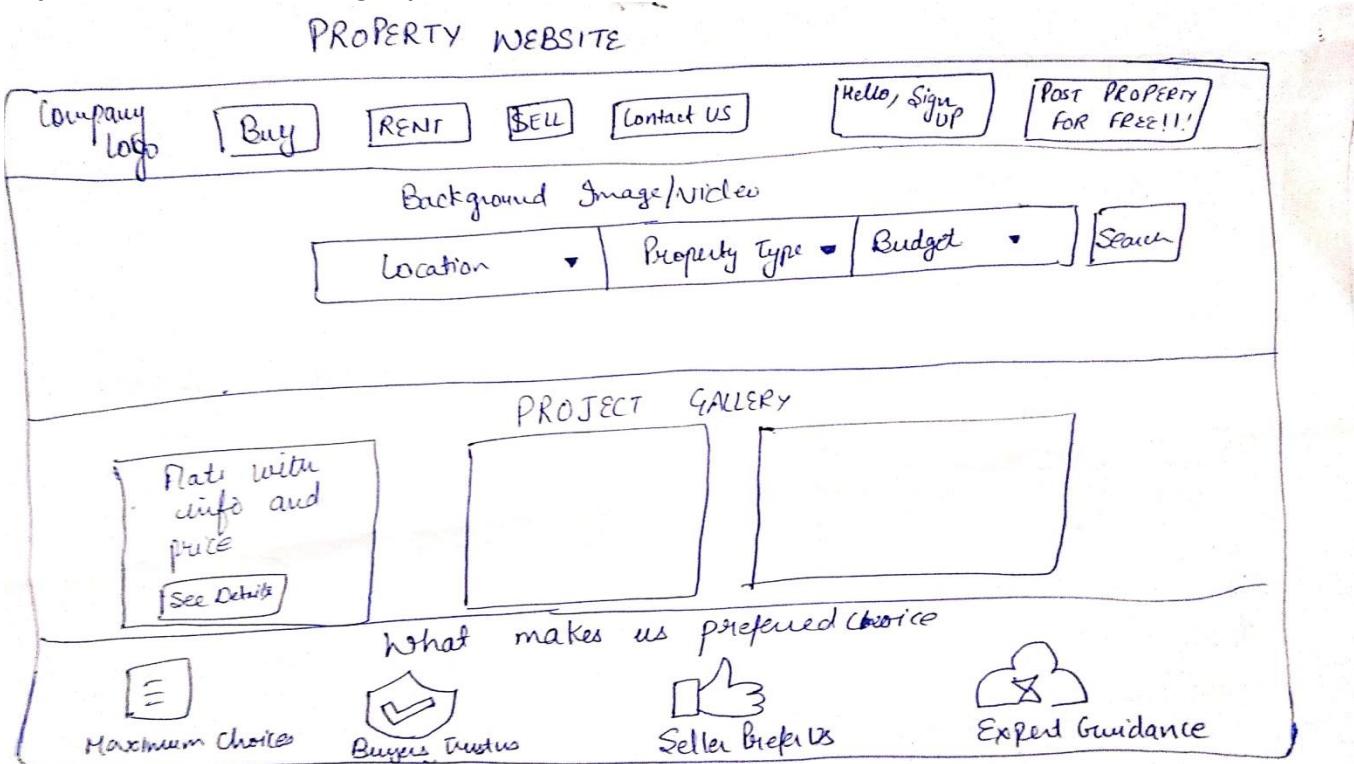

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project No: 3

Project Title: Property Website

Project Description: It should covers the following modules:

Buy, Rent, Sell, Contact us, Sign up

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project No: 4

Project Title: Car Rental System

Project Description: It should include the following modules

Sign up, login, manage booking, popular locations

The wireframe illustrates a user interface for a car rental system. At the top, there is a header with the title "CAR RENTAL SYSTEM". Below the header, there is a navigation bar with five items: "Sign up", "Login", "Manage Booking", and "Popular Locations". To the left of the navigation bar, there is a placeholder for "website logo". Below the navigation bar, the main content area has a heading "Car Hire - Search, Compare & Save". Underneath this heading, there is a section labeled "Image / Video". On the left side of the main content area, there is a form titled "Let's find your ideal car". This form includes fields for "Pick up location" (with a dropdown menu), "Pick up date" (with a dropdown menu), "Dropoff Date" (with a dropdown menu), "Purpose of rental" (with radio buttons for "Business" and "Leisure"), and "Things" (with two checkboxes). A "Search" button is located at the bottom of this form. On the right side of the main content area, there is a section titled "Our most popular Destinations". This section features four boxes, each containing a city name: "Mumbai", "Bangalore", "Delhi", and "Noida". There are also two empty rectangular boxes below these.

Rubrics:

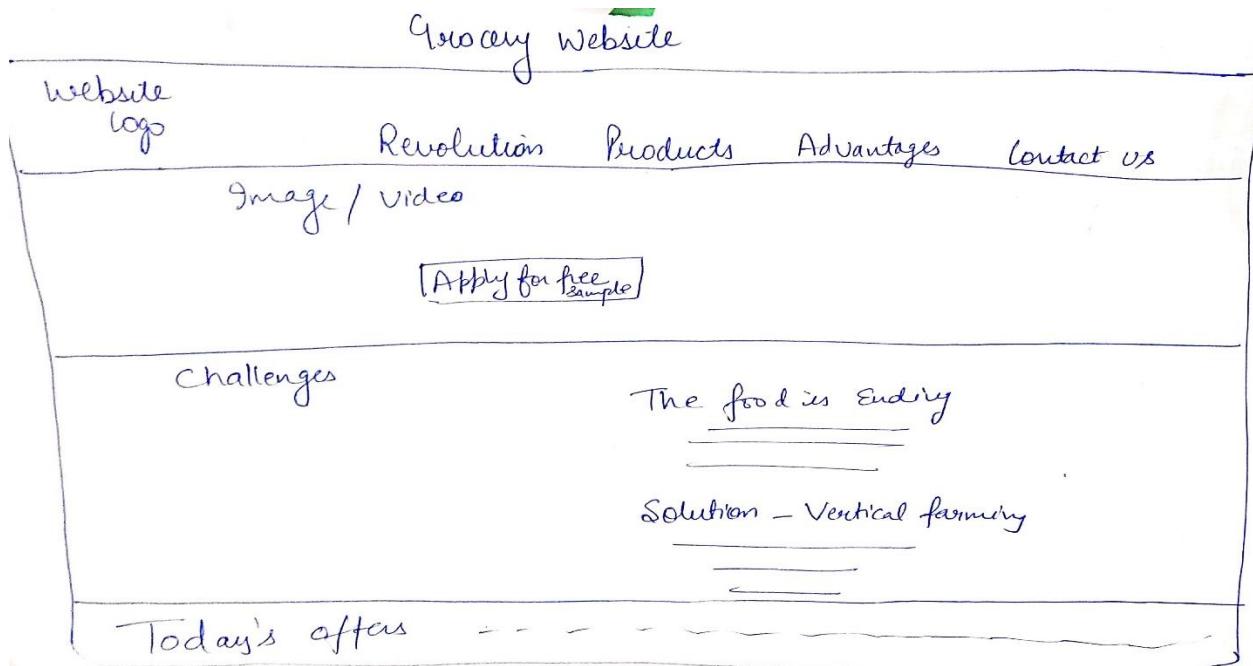

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project No: 5

Project Title: Grocery website

Project Description: It should include the following modules

Revolution, products, advantages, contact us

Rubrics:

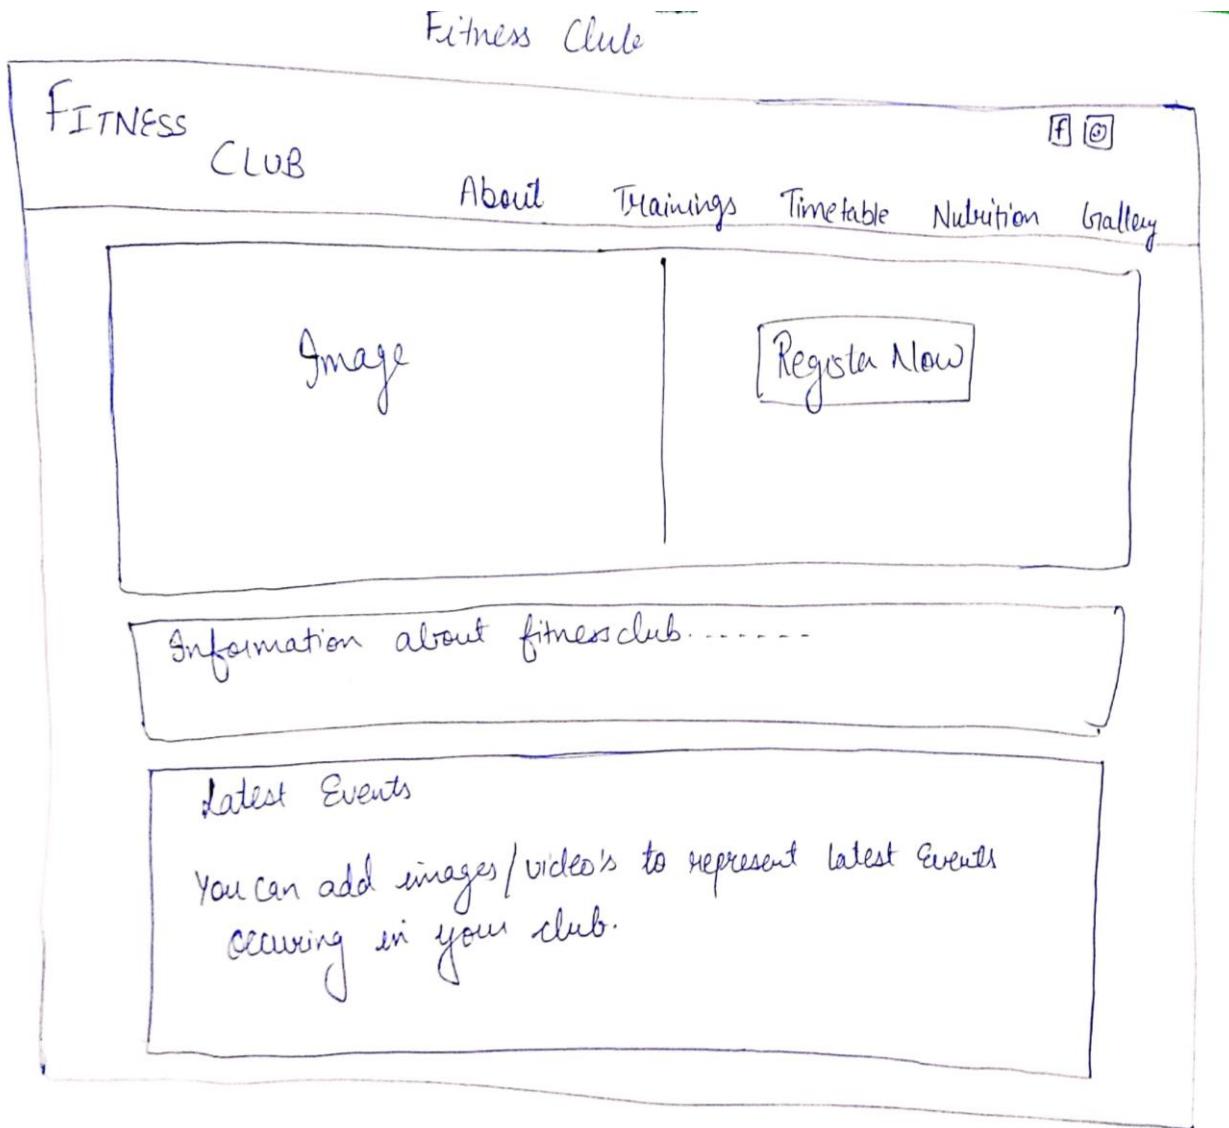

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project Title: Event management System

Project Description: It should include the following modules

Home, type, organize, about us, my account, event details, contact us.

Description:

This is an Online event management system software project that serves the functionality of an event manager. The system allows only registered users to login and new users are allowed to register on the application. The project provides most of the basic functionality required for an event. It allows the user to select from a list of event types. Once the user enters an event type e.g. (Sports event, Marriage, Dance Show etc), the system then allows the user to select the date and time of event, place and the event equipment's. All this data is logged in the database and the user is given a receipt number for his booking. This data is then sent to the administrator (website owner) and they may interact with the client as per his requirements and his contact data stored in the database.

Project Title: News Channel Website

Project Description: It should include the following modules

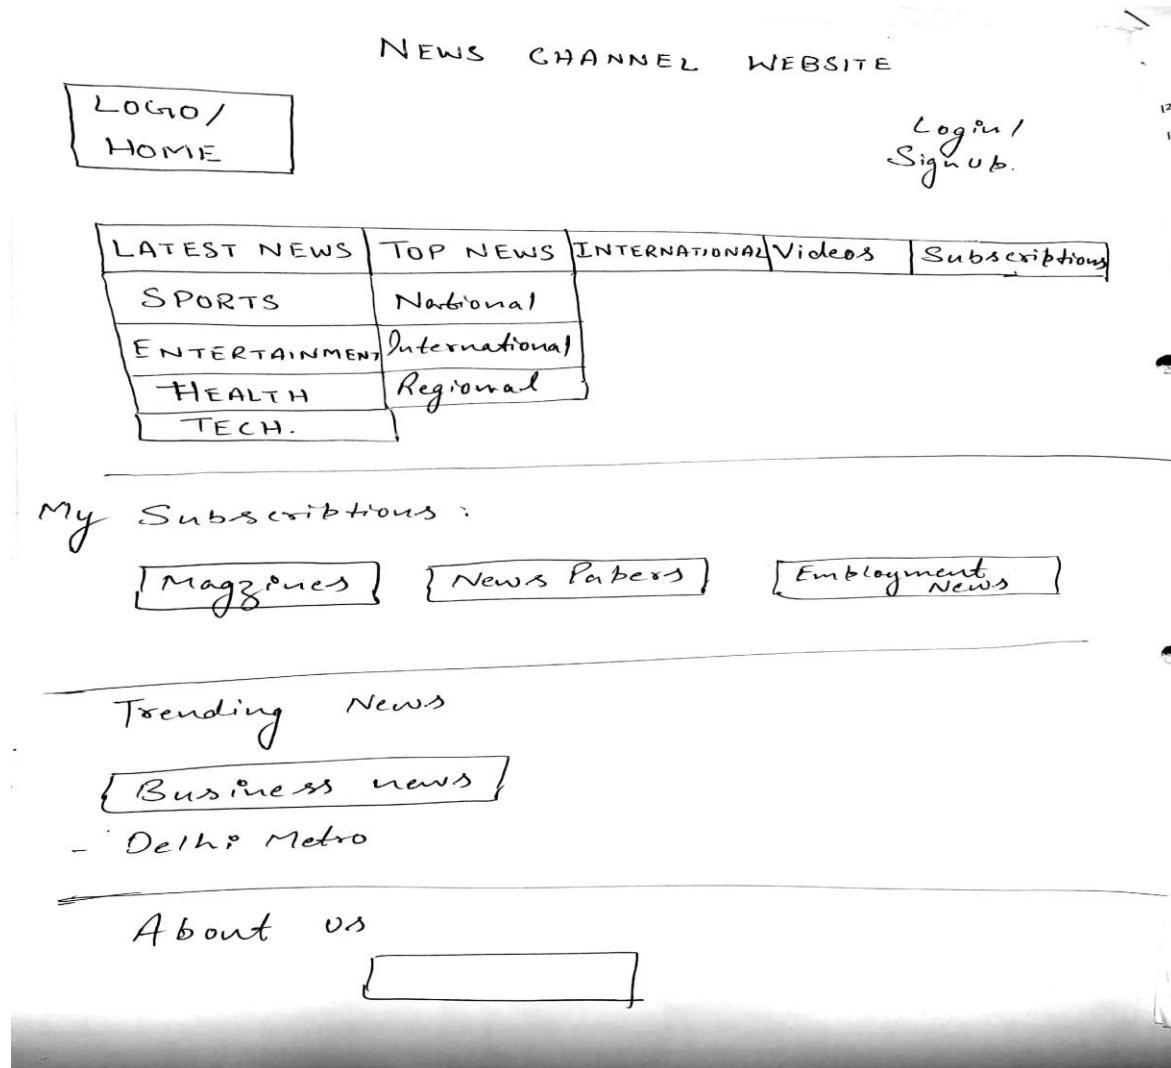

Home, Latest news, top news, international, videos, subscription, trending news

Description:

An **online newspaper** is the online version of a newspaper, either as a stand-alone publication or as the online version of a printed periodical.

Going online created more opportunities for newspapers, such as competing with broadcast journalism in presenting breaking news in a more timely manner. The credibility and strong

brand recognition of well-established newspapers, and the close relationships they have with advertisers, are also seen by many in the newspaper industry as strengthening their chances of survival. The movement away from the printing process can also help decrease costs.

Project Title: Online Vehicle breakdown assistance

Project Description: It should include the following modules

Home, Services, Plans, FAQs, Coverage area, Book service, about us.

Description:

The proposed application helps to find mechanics easily and quickly. It is difficult to find mechanics nearby area wherever you are travelling. This system helps to overcome this issue by providing mechanic details in one click. Here the locator allows you to search mechanics from different locations. Admin is allowed to access and manage mechanic details. This online mechanic locator reduces work and can easily find the mechanics from various location. Reduces your time and cost. The main objective is to provide a better service and to make the process easily and finally appointing a mechanic quickly. Proposed system is accessed by three entities namely, Admin, Mechanic and User. A mechanic can perform task such as viewing request received from users and can also send feedback to the admin. User can send a request and can appoint a mechanic on respective date-time.

Project Title: Online mobile Billing/Recharge Website

Project Description: It should include the following modules

Home, Quick Recharge, Postpaid, Prepaid, Plans, My Account, Recharge, About Us

Description:

Online mobile recharge is a mode of payment using mobile phones. Instead of using methods like cash, cheque, and credit card, a customer can use a mobile phone to transfer money or to pay for goods and services. A customer can transfer money or pay for goods and services by sending an SMS, using a Java application over GPRS, a WAP service, over IVR or other mobile communication technologies. In India, this service is bank-led. Customers wishing to avail themselves of this service will have to register with banks which provide this service.

Project Title: Online pizza ordering

Project Description: It should include the following modules

Home, Pizza Type, Location, Contact US, Cart, Offer zone, About Us.

Description:

Pizza delivery is a service in which a pizzeria or pizza chain delivers a pizza to a customer. An order is typically made either by telephone or over the internet to the pizza chain, in which the customer can request pizza type, size and other products alongside the pizza, commonly including soft drinks. Pizzas may be delivered in pizza boxes or delivery bags, and deliveries are made with either an automobile, motorized scooter, or bicycle. Customers can, depending on the pizza chain, choose to pay online, or in person, with cash, credit card, debit card or cryptocurrency. A delivery fee is often charged with what the customer has bought.

Project Title: Hostel accommodation system for students of LPU

Project Description: It should include the following modules

Home, Apply, Boys Hostel, Girls Hostel, My account, Registration Status, About Us.

Description:

Hostels provide lower-priced, sociable [accommodation](#) where guests can rent a [bed](#), usually a [bunk bed](#), in a [dormitory](#) and share a bathroom, lounge and sometimes a kitchen. Rooms can be mixed or single, and private rooms may also be available. In the 2010s, hostels often have wifi access.

Hostels are often cheaper for both the operator and occupants than hotels; hostels may have long-term residents who they employ as desk agents or housekeeping staff in exchange for experience or discounted accommodation.

Project No: 12

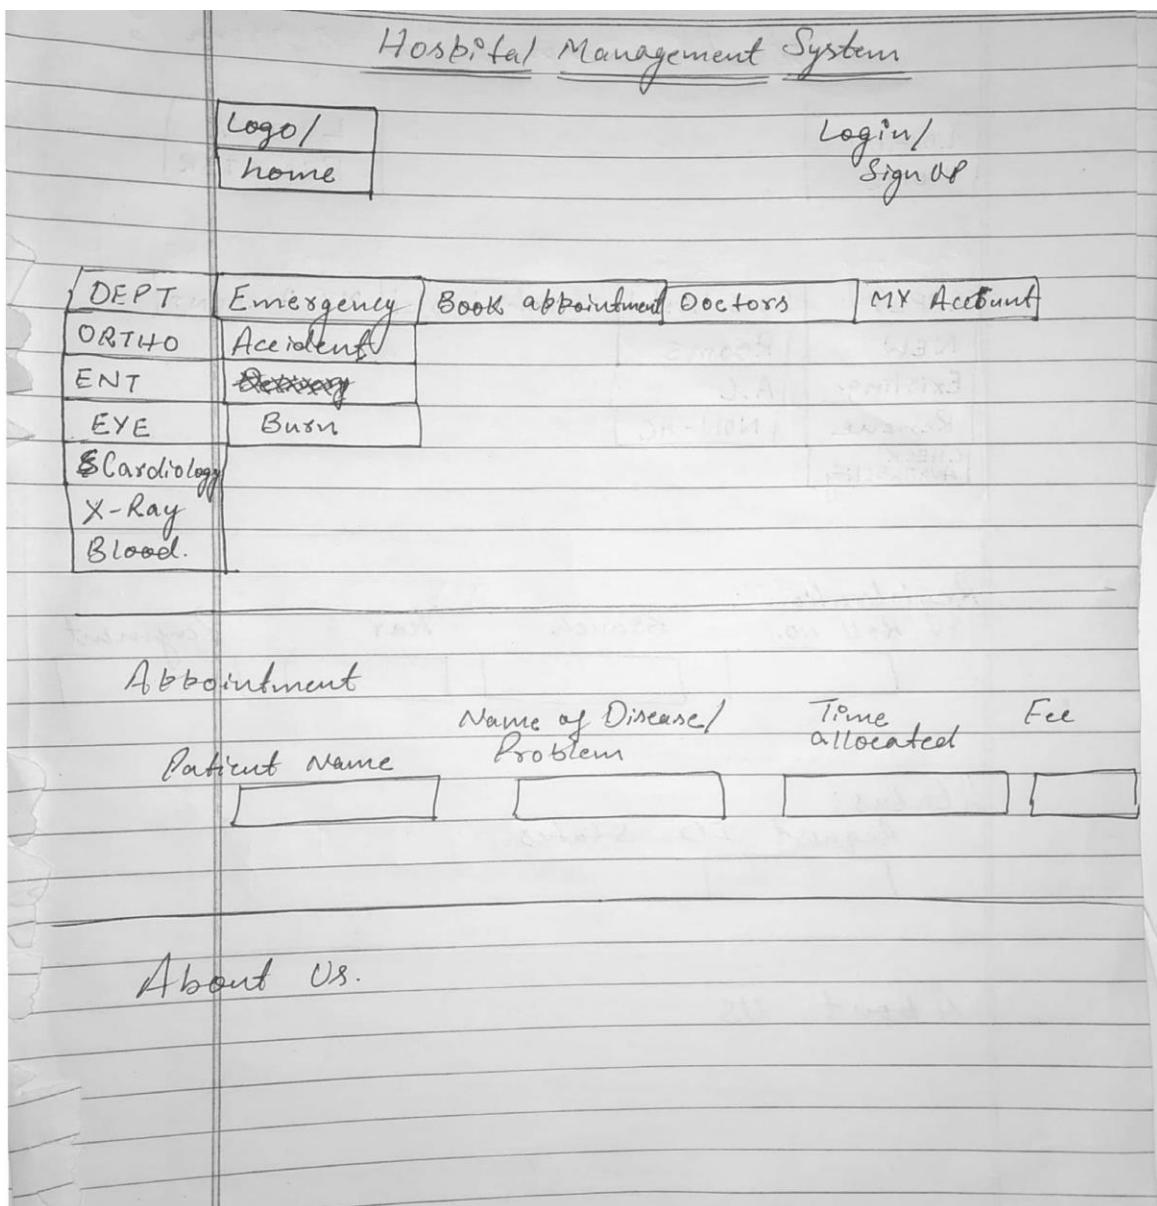

Project Title: Hospital Management System

Project Description: It should include the following modules

Home, Department, Emergency, Book Appointment, Doctors, My account, Appointment details, About us.

Description:

Hospital management system is an online patient management and Appointment, Scheduler application software for getting an appointment very easily over the internet. This [Hospital management system](#) application software is built upon using html, CSS, and java script. Hospital can take the online patient appointment and patient can take doctor schedule from anywhere in the world.

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project No: 13

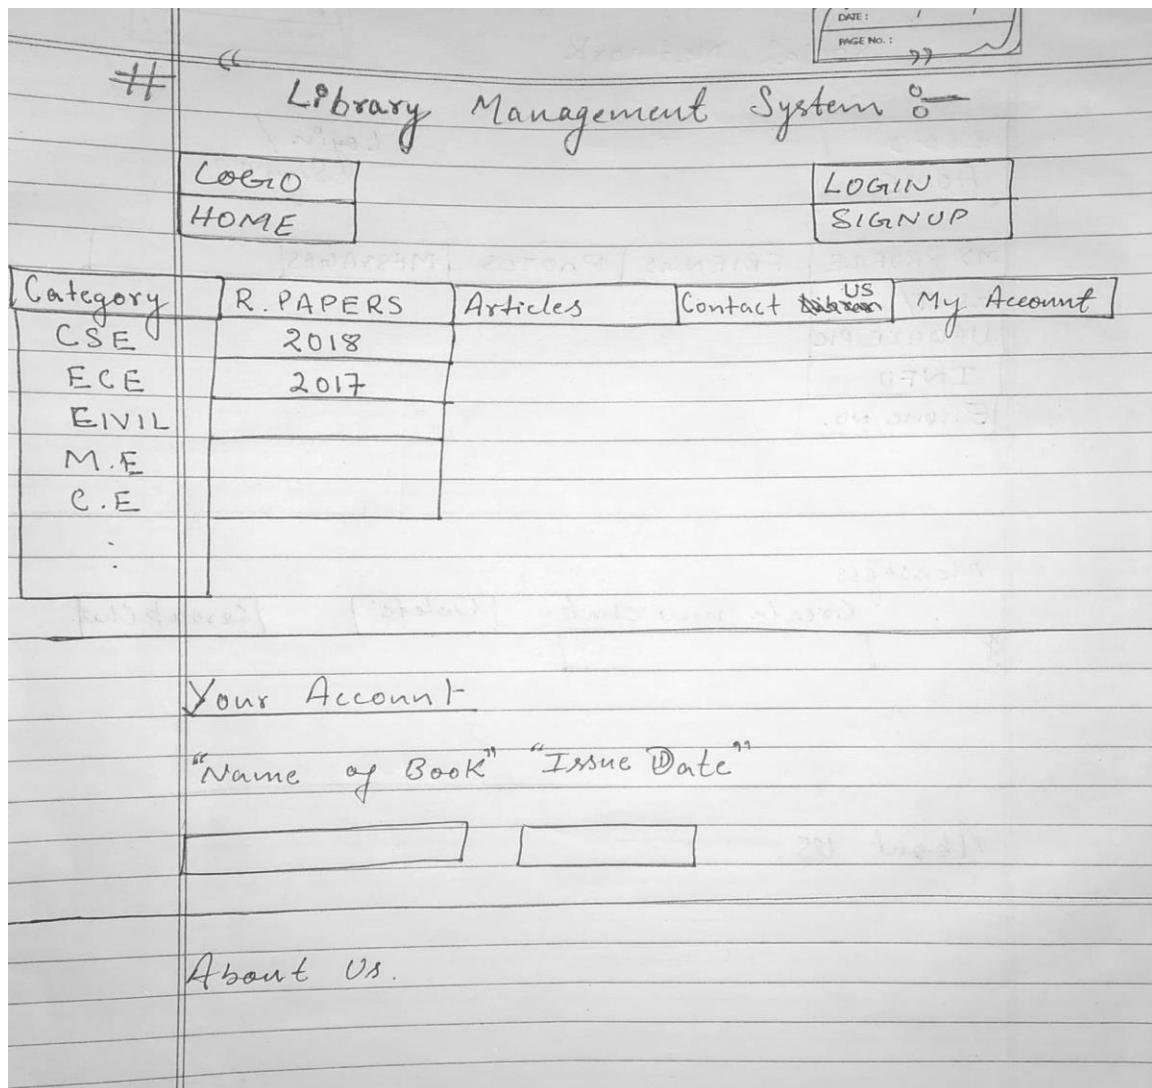

Project Title: Library management System

Project Description: It should include the following modules

Home, Category, Research Papers, Articles, Contact Us, My account, Your Account, About Us.

Description:

A college library management is a project that manages and stores books information electronically according to student's needs. The system helps both students and library manager to keep a constant track of all the books available in the library. It allows both the admin and the student to search for the desired book. It becomes necessary for colleges to keep a continuous check on the books issued and returned and even calculate fine. This task if carried out manually will be tedious and includes chances of mistakes. These errors are avoided by allowing the system to keep track of information such as issue date, last date to return the book and even fine information and thus there is no need to keep manual track of this information which thereby avoids chances of mistakes. Thus, this system reduces manual work to a great extent allows smooth flow of library activities by removing chances of errors in the details.

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project No: 14

Project Title: Social Networking Website

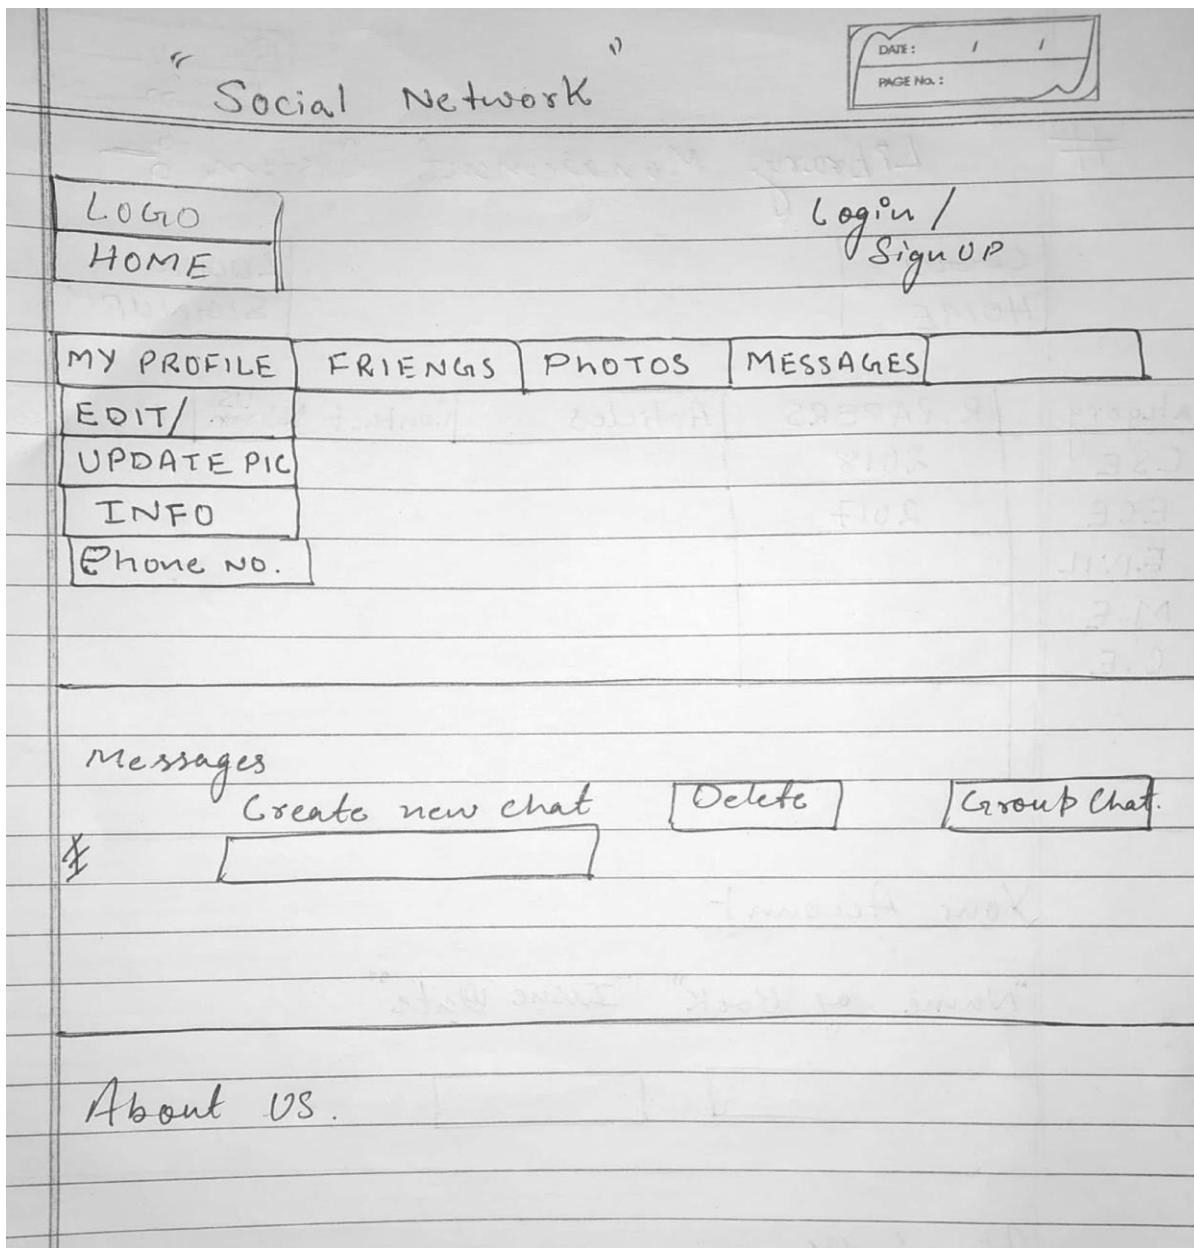

Project Description: It should include the following modules

Home, My profile, Friends, Photos, Messages, New Chat Box, About Us.

Description:

Social networking is the use of internet-based social media programs to make connections with friends, family, classmates, customers and clients. Social networking can occur for social purposes, business purposes or both through sites such as Facebook, Twitter, LinkedIn,

Classmates.com and Yelp. Social networking is also a significant target area for marketers seeking to engage users.

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

PROJECT TOPICS WITH DESCRIPTION

- 1) Music World HTML Project

Name of the Project : **Music World**

Project Objectives : Create a website which displays all the information about music and various categories of music like: jazz, rock, rap, pop and classical. All the information about artists and their Histories.

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

2. Online Seminar Hall and Auditorium Booking System

The Online Seminar Hall and Auditorium Booking System is divided into four main modules. Each and every module performs a particular work. Those 4 modules are

1. Maintenance of user and seminar hall
2. Booking the seminar hall
3. Approval and Rejection by In-charge
4. Role of Principal

Maintenance of user and seminar hall

It consists of Signup, Login and update details of the seminar halls, users. The Administrator creates a separate account for each Department, Seminar hall in-charges, other cells like placement and training, EMDC etc., and Principal.

Booking the seminar hall

Each department has the username and password to book the seminar hall for their requirement. Through this they can view the available dates of particular seminar hall and also the facilities in the hall like capacity, mic's, projector, marker board etc., This provides user-friendly environment while booking the seminar hall it gives suggestion regarding the selection of seminar hall based on the capacity and availability. The concern department head can view the list of the request. The acceptance and rejection can be viewed by the user through that log in or even by the email id.

Approval and Rejemailon by In-charge

The role of seminar hall in-charge is to check the request came to the seminar hall. When in-charges login into their account the list of new requests are displayed in their page as shown. The request can be either accepted or rejected based on the priority of the request. If more than one request is made for the same seminar hall on the same date after granting approval to a particular request by seminar hall in-charge, the remaining requests are automatically rejected and the email is sent to the bookie and also it is notified on their page.

Module – IV: Role of Principal

The Principal can view the entire process which is happening on the website and can fetch the data from the past to present who all are used the seminar hall. In an emergency case, he can reject the accepted request and the email will be sent to the booker as well as the seminar hall in-charge by suggesting alternate seminar halls.

Rubrics:

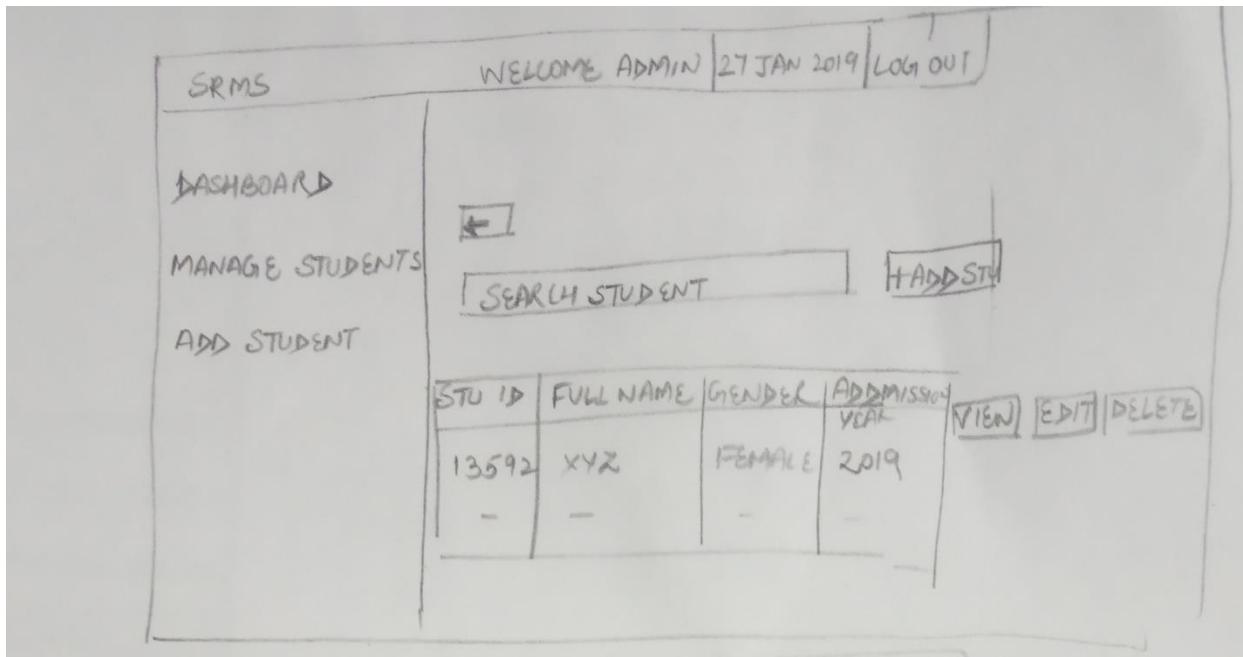

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

3. Student Record Management System

it contains an admin side from where a user can maintain student records easily. The Admin plays an important role in the management of this system. In this project, the user has to perform all the main functions from the Admin side.

About System

In order to add student records, the user has to provide various information such as his/her name, gender, D.O.B, admission year, parent phone, report, and a passport photo. After this, the user can easily manage student's record and can update, remove if he/she wants.

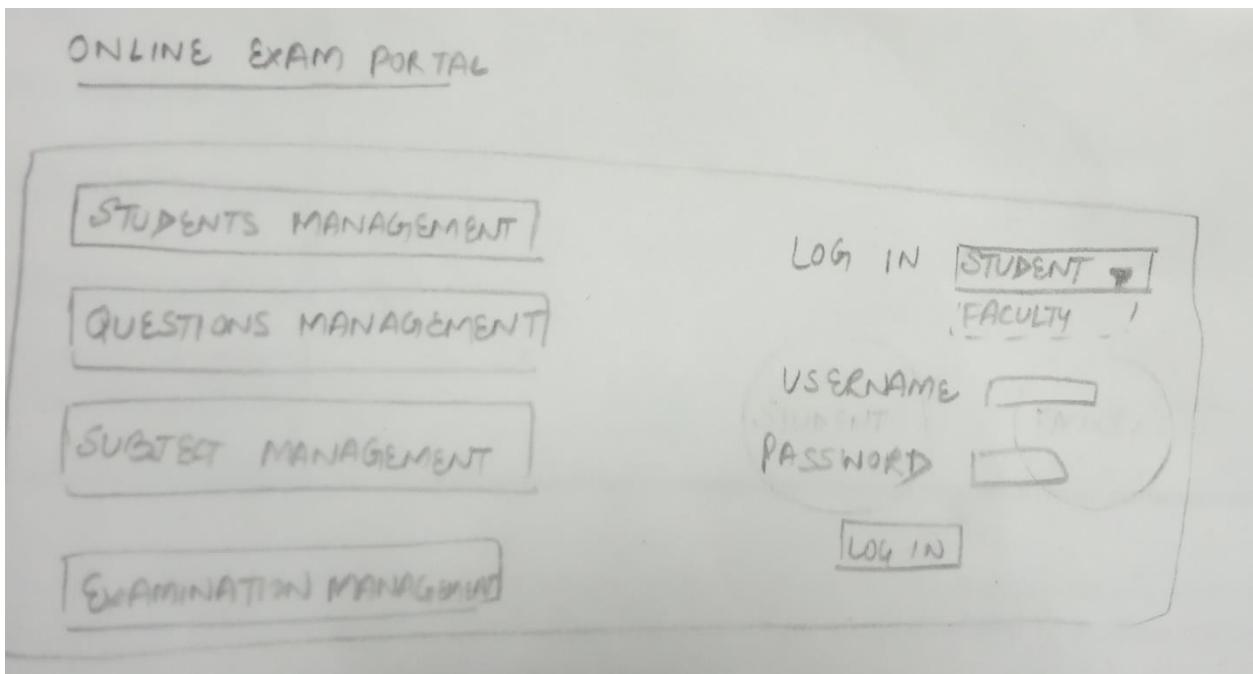

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

4.Examination Management system

Description: The main purpose to develop this project is to take the exams of computer science students. There are two types of users available :

1. Super admin- who has to manage everything of the project
2. Teacher-who is responsible for adding Question paper subject wise

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

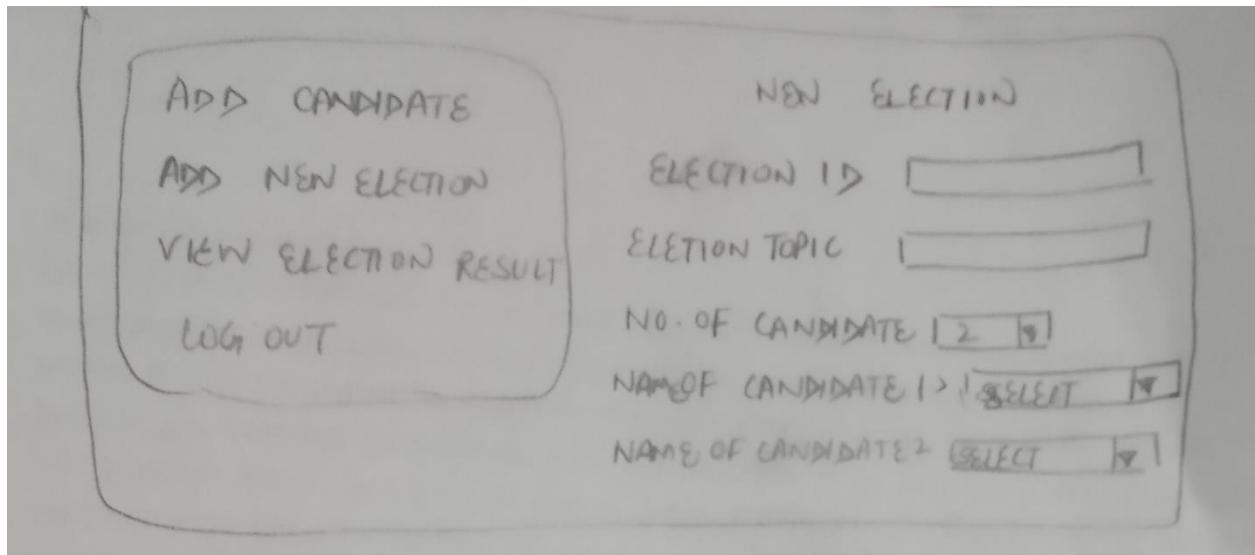

5. Online Election System Project

Online Election System would have Candidate registration, document verification, auto-generated User ID and pass for candidate and Voters. Admin Login which will be handled by Election Commission .Candidate Login which will be handled By Candidate, Voters will get Unique ID and Password, Using which they can vote for a Candidate only once per Election. The project is beneficial for Election Commission, Voters as the can get to know the candidate background and choose wisely, and even for Candidate. The software system allows the Candidate to login in to their profiles and upload all their details including their previous milestone onto the system. The admin can check each Candidate details and verify the documents, only after verifying Candidate's ID and Password will be generated, and can remove faulty accounts. The software system allows Voters to view a list of Candidates in their area. The admin has overall rights over the system and can moderate and delete any details not pertaining to Election Rules.

Modules:

- Admin Login
- Candidate Document Verification.
- Candidate Login
- Voters Login
- Voters can view Candidate's data

- Admin dashboard has overall functional rights
- Appropriate data processing and handling
- System generated ID and Password for Candidate and Voters.
- Result Calculation module
- Election Creation module
- Voting conduction module

Rubrics:

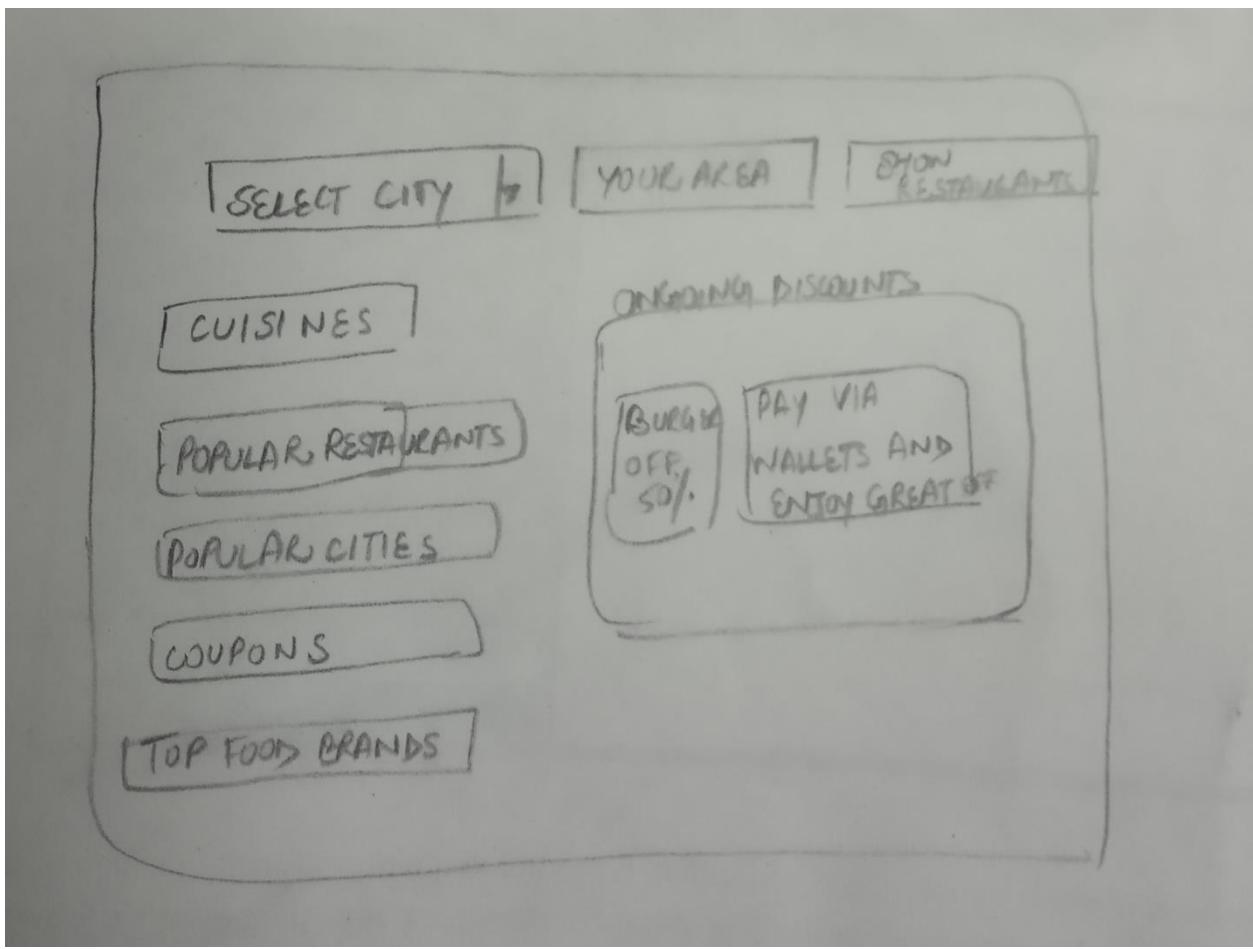

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

6. Online Food ordering System

The main objective of online food ordering system is to automate the existing manual system with the help of advance computerized software so, that valuable data can be stored for longer period with easy accessing and manipulation of the same.

The registered user can access the account with valid credentials. User can surf the food items according to categories, Cart and online payment options are available to user. User can track their orders with the food details.

In Online Food Ordering System Admin can handle the functionalities like add new food items, edit/delete food items, Enable/Disable the food items according to season and availability. Admin have authority to view order details and update the delivery status of food. The payment transaction and user details are also viewable to admin.

Rubrics:

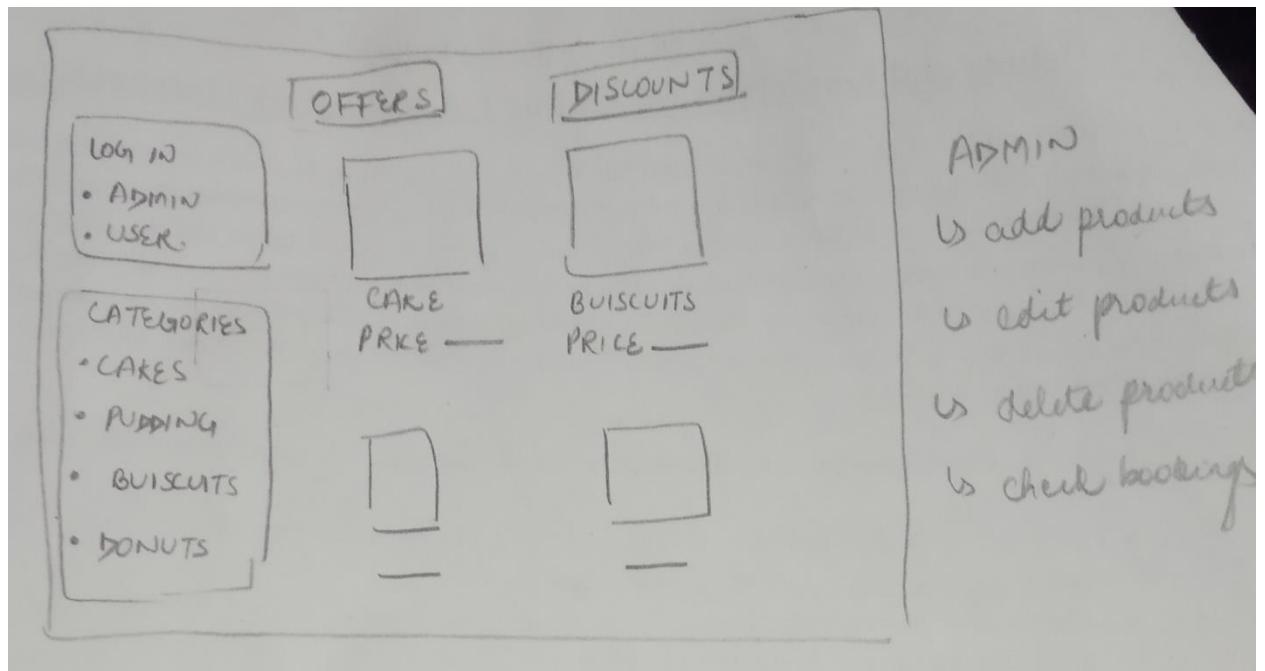

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

7. Online Bakery System

This online Bakery shop allows users to check and purchase various bakery products available online. The project consists of list of bakery products displayed in various categories and the user can browse through the items. User can add the selected items it to his shopping cart. User needs to register on the site before checking out. He can then login using same id password next time. Now he may pay through a credit card or cash on delivery. The user receives a copy of the shopping receipt on his email id after the successful transaction. Here we use user-friendly interface to make the entire frontend. The middle tier or code behind model is designed for fast processing. In addition, SQL serves as a backend to store bakery products lists data. Thus, the online Bakery shopping project brings an entire bakery shop online, making it easy for both buyer and seller.

Modules:-

- **User Registration:** User can register on the system and get his online account on site.
- **User Login:** User can login to system and check various bakery items.
- **Product Categories:** The bakery products are arranged and can be viewed in categories.
- **Add to cart:** Users can add new items to cart.
- **Custom Cake:** User may order a custom cake as per his needed flavor, size, and shape on site.
- **Dummy Credit Card Payment:** After total bill is calculated user can pay via credit card online.
- **Email confirmation:** On successful payment a thank you message is sent to user.

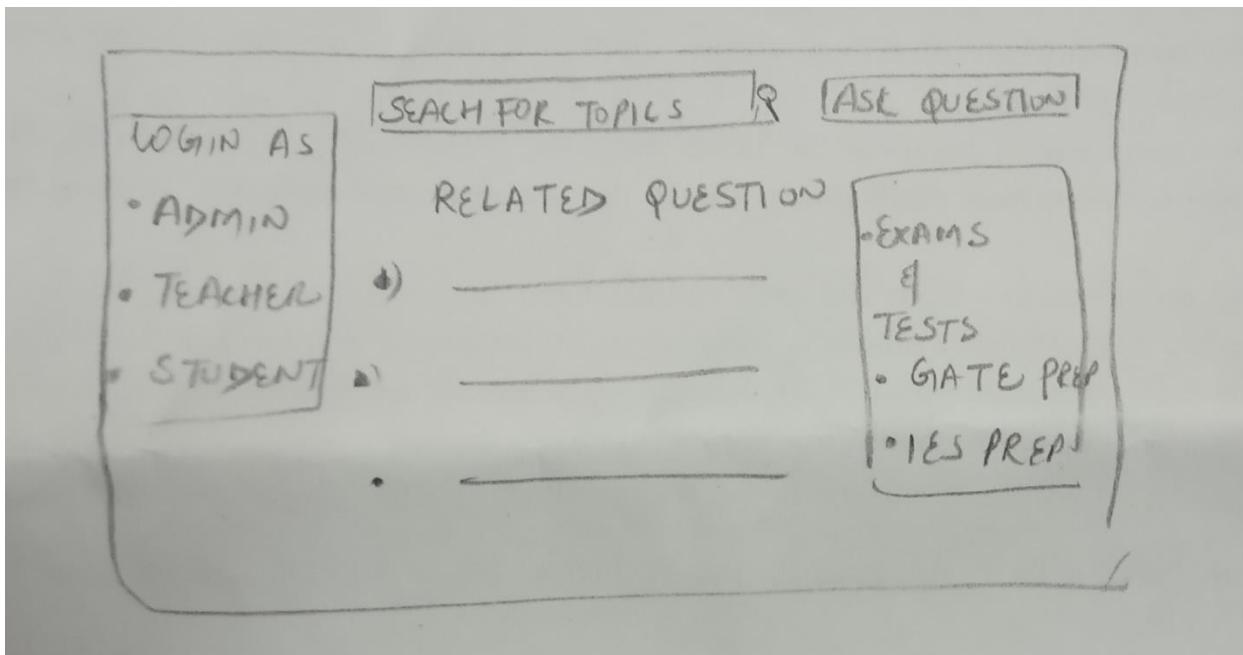

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

8. Internet based Discussion Forum

Student centered learning and the creation of student centered spaces online are gaining credence in educational settings. We know that effective learning requires access to social and academic networks for both study material and emotional support; as such, online communities can offer a holistic knowledge construction, support mechanism, and recognize that affective activity is effective. Social forums, often called ‘Virtual Cafes’ or ‘Common Rooms’ can be set up for courses or for programs, depending on the student need. These spaces provide students to come together and discuss unlimited topics, including social

activities and educational ideas. They are supportive spaces for students, most successful with large first and second year courses where students would not otherwise have the opportunity to communicate with others outside their own tutorial group. There are four entities will have the access to the system as follows admin, teacher, Student, Alumni. Admin manages the system by approving the threads added by the students, teachers and alumni. Admin can view all the threads and can mark a post as favorite, which will be listed at the top of all the discussion forums. Teacher, Student and Alumni need to register himself or herself by filling up basic registration details and create a valid login id and password. All the entities have to login with their valid credentials in order to access the system. System allows teachers, students and alumni to create a thread/post which will be displayed among themselves and start a discussion be commenting/replying and also can like a thread/post.

Rubrics:

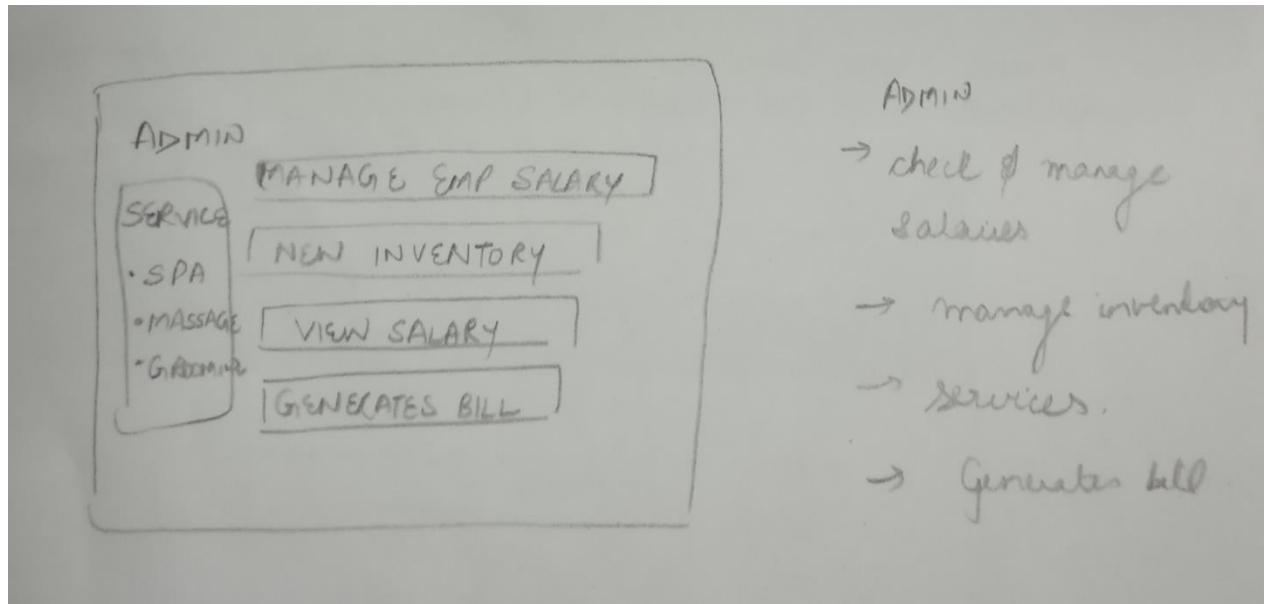

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

9. Salon management system

Salon management system is specially designed for managing a hair salon. This system keeps track of all the activities that are carried on daily within the salon. It maintains stock of inventory coming in. It also manages individual employee salary. The system is even equipped to manage customer billing and data storage. This fully equipped system alone manages the entire functioning of a hair salon.

The system works as follows:

- Administrator may login to the system.
- He may then manage and check employee salaries due date and payment to be made.
- The system also keeps track of inventory coming in.
- An employee login is also present for customer billing.
- As the employee enters various services, the system calculates the bill and generates the bill.
- This customer data is also separately stored in a database.

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

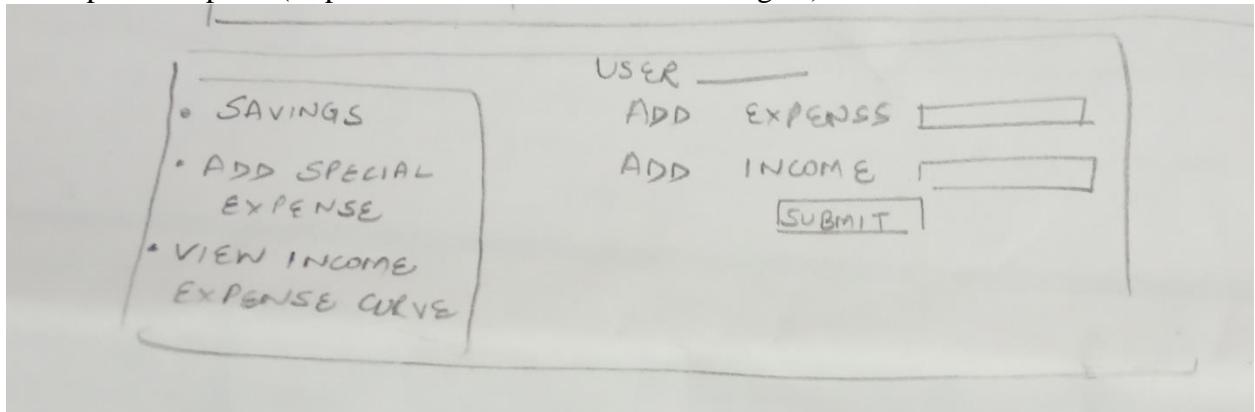

Daily Expense Tracker System

10. Daily Expense Tracker System is designed to keep a track of Income-Expense of a Housewife on a day-to-day basis. This System divides the Income based on daily expenses. If you exceed day's expense, system will cut it from your income and will provide new daily expense allowed amount. If that day's expense is less, system will add it in savings. Daily expense tracking System will generate report at the end of month to show Income-Expense Curve. It will let you add the savings amount, which you had saved for some particular Festivals or days like Birthday or Anniversary.

Modules:

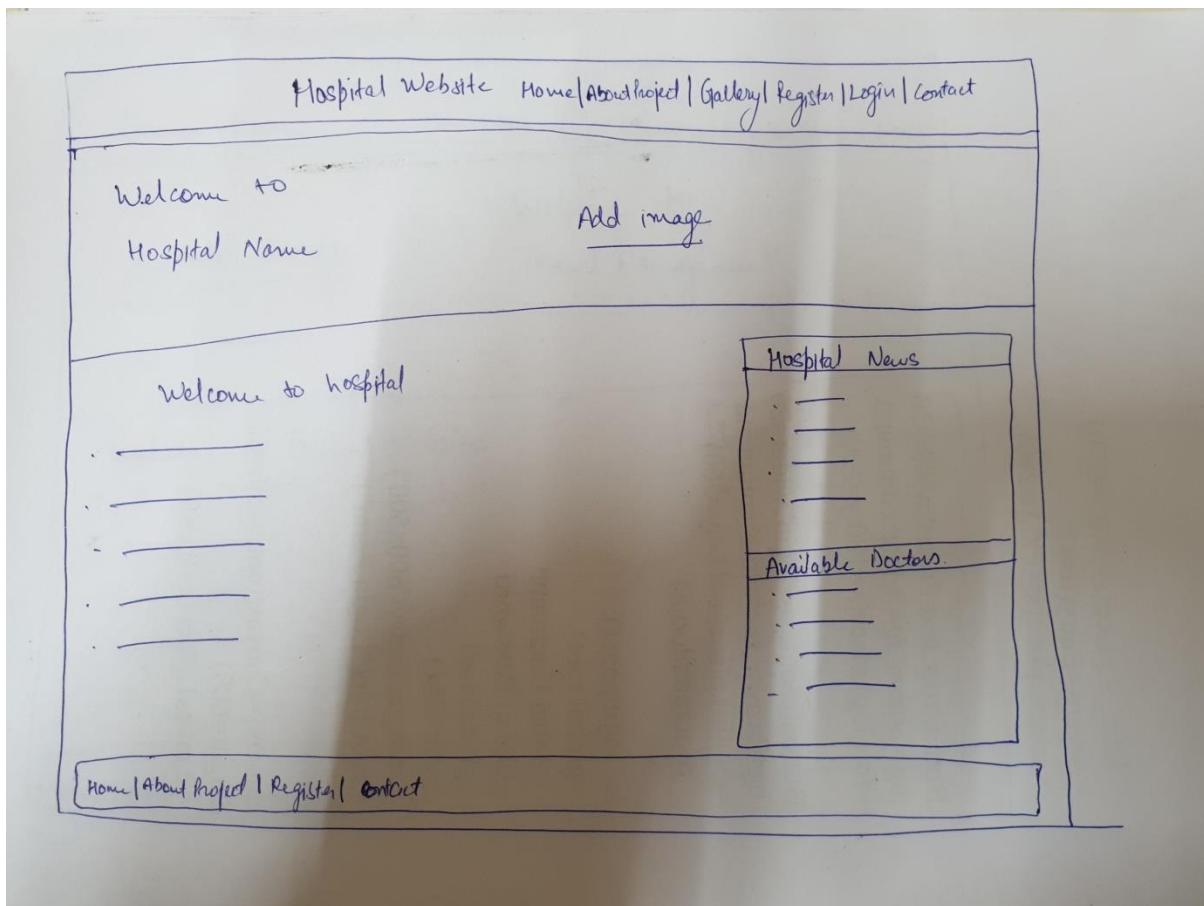

- User (House-Wife) Login.
- User (House-Wife) Register.
- Add Expense.

- Add Income.
- View Income-Expense Curve.
- Savings.
- Add savings to income for next month.
- Add Special Expense(Expense which will be refunded to again)

- **Rubrics:**
- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

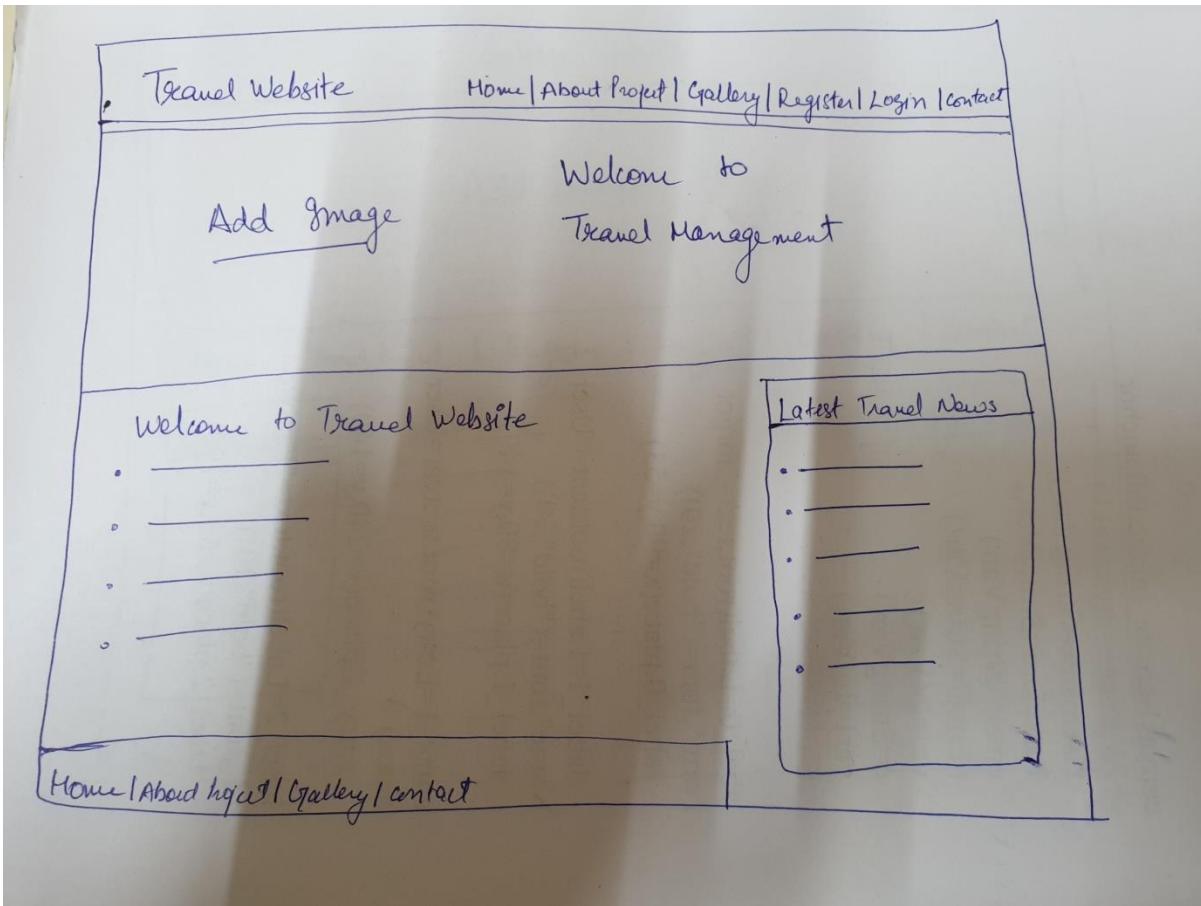

Project 1:

Rubrics:

- Pre-submission report includes module wise description, role and responsibility of each group members and work plan as Gantt chart(5 Marks)
- Hard Copy report and project submission includes content relevance, methodology and implementation(5 Marks)
- Viva and Presentation (10 + 10 Marks).

Project 10:

Rubrics:

- Pre-submission report includes module wise description, role and responsibility of each group members and work plan as Gantt chart(5 Marks)
- Hard Copy report and project submission includes content relevance, methodology and implementation(5 Marks)
- Viva and Presentation (10 + 10 Marks).

Project No: 1

Project Title: Common Wealth Games

Project Description:

This site contains information about the list of all the games that are there in common wealth along with the details of where and when it is going to be held next and schedule for the same.

It should cover the following modules:

Our Games, Teams and Countries, Athletes and results, Recent news, etc.

Rubrics:

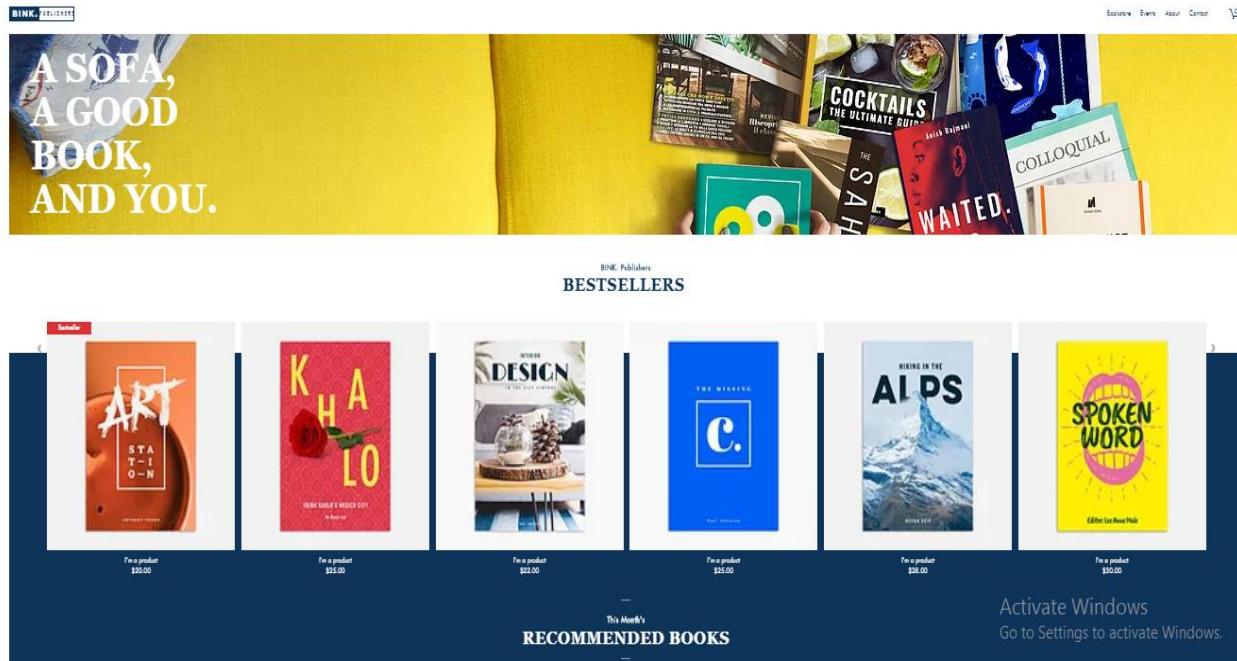

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project Title: Online Book purchasing website

Project Description:

E-commerce site for book purchasing. But following modules can be added to this project:

- Display of products along with their brief details
- Products categories
- Sign up and sign in page
- User reviews to be included
- Add to cart option
- Page for payment

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project Title: Blood Donation

Project Description:

Blood Donation site contains information about the number of blood banks and applicants willing to donate blood. Both Doctors and users can register to the site. It can be used in case of emergency to search for potential donors and availability of blood in nearby blood banks. It should covers the following modules

- Information about the site.
- Discussion forums of user and doctor.
- Registration form for users and doctors.
- User should be able to search for potential donors in nearby area.
- List of available blood banks in the city.
- Doctor should contain information about medical records of potential donors.

Project Title: Restaurant

Project Description:

Restaurant site should contain information about the number of restaurant available in the city, the famous ones. It should contain the information about the particular restaurants like location and kind of food particular restaurant is offering. It should cover the following modules.

- Information about the restaurants available in the city.
- Locations of particular restaurants and variety of food they are offering.
- User can view the remarks on the particular restaurant given by others
- User can give the remark to a particular restaurant
- Discussion forum
- Availability of offers on a particular restaurant.
- Pictures of interiors of restaurants.
- Directions to a particular restaurant.

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project Title: Tourism

Project Description:

In this project, following modules can be included:

- Glance of the place which can include information about the geography, festivals, seasons and people, etc.
- Option for planning the vacation
- Information about various hotels and restaurants
- Option for ticket booking
- Login and sign up page
- User reviews can be included
- Information about the places that can be visited

- Viva and Implementation (10+10 Marks)

Project Title: Railway Reservation

Every link should be in Working Condition

Rubrics:

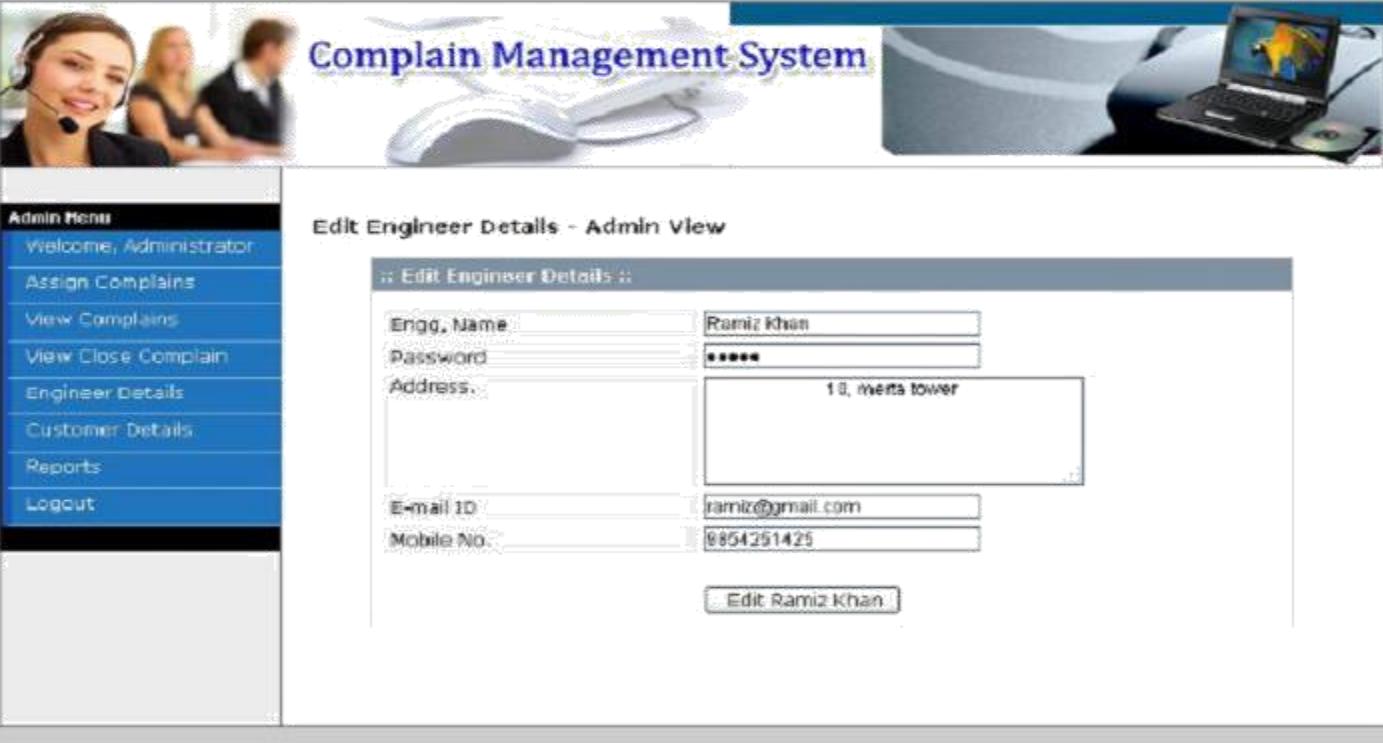

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project Title: Complaint Management

Every link should be in Working Condition

The image shows the login page of the Complaint Management System. At the top, there is a banner featuring three people in a call center environment and a laptop displaying a map. Below the banner, the title "Complain Management System" is displayed. A "User Login" header is followed by input fields for "User Name" (admin), "Password" (*****), and "User Type" (a dropdown menu showing "...Select User..."). Below the input fields are links for "New Customer Register Here" and "Forgot Password". A "Login Now" button is at the bottom.

The image shows the "Edit Engineer Details - Admin View" page. On the left, a sidebar titled "Admin Menu" lists "Welcome, Administrator", "Assign Complain", "View Complain", "View Close Complain", "Engineer Details", "Customer Details", "Reports", and "Logout". The main content area has a header "Edit Engineer Details". It contains fields for "Engg. Name" (Ramiz Khan), "Password" (*****), "Address" (10, mehta tower), "E-mail ID" (ramiz@gmail.com), and "Mobile No." (8854251425). A "Edit Ramiz Khan" button is at the bottom right.

Rubrics:

- Pre-submission report - includes module wise description, role and responsibility of each group members and work plan as Gantt chart (5 Marks)
- Final report (5 Marks)
- Viva and Implementation (10+10 Marks)

Project Title: Banking Management

Every link should be in Working Condition

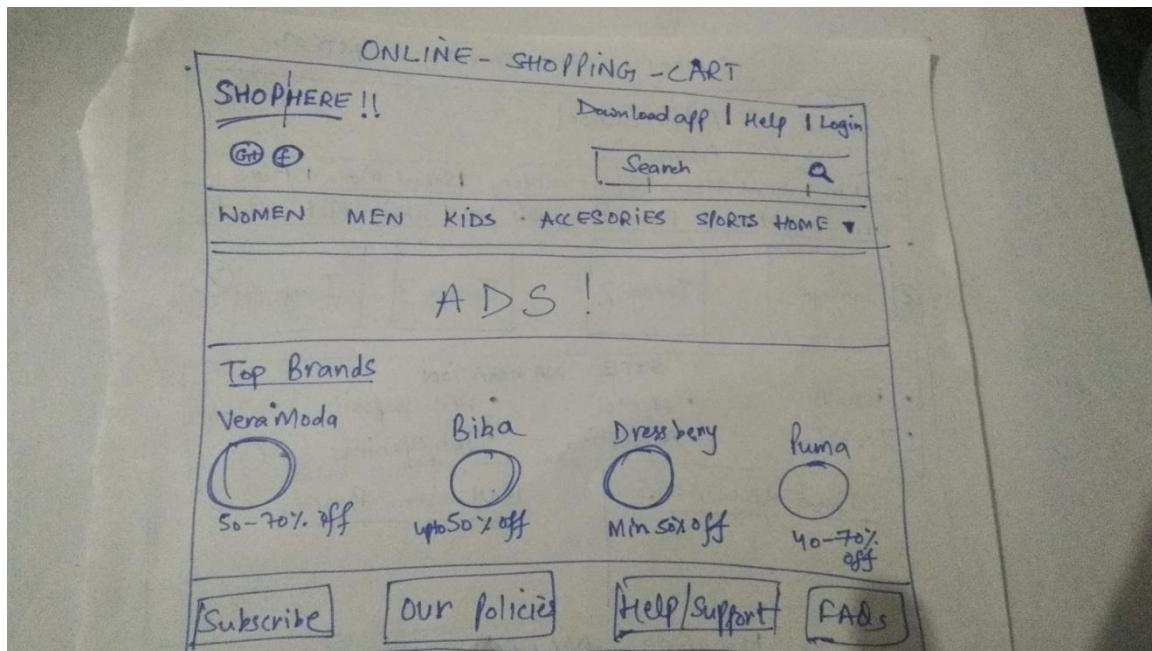

The screenshot shows the 'Online Banking' interface for a user named TOUSIF KHAN. The top banner features a man using a laptop with a globe graphic. The left sidebar has a profile picture and navigation links: Account Details (selected), Account Summary, Account Details, Account Statements, Fund Transfers, Security Settings (selected), Change Password, Change PIN, and Sign Out. The main content area displays a 'Funds Transfer' form with fields for Receiver's Bank Name, Receiver's Name, Receiver's Account Number, SWIFT/BBA Routing Number, and Sender's Account Number (set to 1234550000). A note at the top of the form says: 'Fund transfer is a process of transferring funds from your account to other account in same bank. Please make sure that you have enough funds available in your account to transfer. Also don't forget to validate receiver's account number.'

The screenshot shows the 'Admin Main Page'. The top banner features a man using a laptop with a globe graphic. The left sidebar has navigation links: Home (selected), User Details, Account Details, and Logout. The main content area displays two buttons: 'Account Information' (with a bank icon) and 'Users Details' (with a user icon). Both buttons have descriptive text below them: 'Get the account details of any customer, credit, debit funds from it or activate, de-activate fund transfers.' and 'View all of your customer details, activate or deactivate them for login to the system, or delete them.'
